

Common Name	Genus species	Cultivar	Light	Height	Bloom	Color	Product Description
Silberlocke Fir	Abies koreana	Silberlocke	sun	8'	foliage	N/A	NEW! Every deep-green needle curls backward to reveal pale, silvery undersides. This pyramidal conifer creates marvelous two-tone effect in the garden.
Green Arrow Falsecypress	Chamaecyparis	Green Arrow	sun-part shade	15 - 20'	N/A	N/A	Fast growing, semi-pendulous narrow form of an Alaskan native. Dark green needles highlight the very open, airy branches. Extremely hardy; requires a well drained, moisture retentive soil.
Melody Falsecypress	Chamaecyparis obtusa	Melody	sun-part shade	3'	foliage	N/A	NEW! An outstanding dwarf evergreen conifer. Refined lemon-yellow foliage can take full sun in most locations. Compact, upright growth habit. One of the most attractive of all conifers.
Golden Sprite Japanese Hinoki Cypress	Chamaecyparis obtusa	Golden Sprite	sun-part shade	1'	N/A	N/A	Forms a cute, tight, small, rounded, flat bun-shaped specimen which becomes slightly less regular with age. Leaves are a rich golden yellow gradually shading to green towards the plants interior. Small stems are delicately twisted. A true dwarf gem!
Mother Lode Juniper	Juniperus horizontalis	Mother Lode	sun-part shade	3 - 4"	conifer	N/A	Bright golden-yellow foliage retains its unique color in full sun or partial shade all summer changing to a rich burgundy-plum in winter.
Miss Grace Weeping Dawn Redwood	Metasequoia glyptostroboides	Miss Grace	sun-part shade	8 - 10'	N/A	N/A	Strongly pendulous branches enhanced by soft, feathery small bright green deciduous foliage turning orange-brown in fall. Excellent as a specimen or as an accent!
Wingless Weeper Spruce	Picea abies	Wingless Weeper	sun	6 - 10'	foliage	N/A	NEW! Extremely pendulous. Will lay flat on the ground if not staked, but develops a leader as it matures. Blue-green needles are very short and tight.
Elf Dwarf Alberta Spruce	Picea glauca	Elf	sun	1'	foliage	N/A	NEW! This Alberta gem grows extremely slow and forms a dense globe with short, fine needles that emerge blue-green in spring. Ideal for rock gardens.
Brun's Pendula Spruce	Picea omorika	Brun's Pendula	sun	7 - 8'	foliage	N/A	A tall, extremely narrow specimen with gracefully weeping side branches clothed with bicolored needles with deep greenish-blue tops and silvery undersides.
The Blues Colorado Spruce	Picea pungens f. glauca	The Blues	sun	8 - 10'	foliage	N/A	Beautiful, uniquely colored recent selection of the weeping Colorado Blue Spruce. Vibrant powder-blue foliage retains its distinctive color throughout the season. Staking the leader shoot is necessary to achieve and maintain the desired pendulous effect.
Jack Korbit Korean Pine	Pinus koraiensis	Jack Korbit	sun	6'	foliage	N/A	Exceptionally soft lush blue-green needles display an attractive slightly yellow banding variegation in colder climates although still beautiful in no variegation is present.
Gold Medal Pine	Pinus sylvestris	Gold Medal	sun	5'	foliage	N/A	NEW! Short and glowing, this slow-growing upright evergreen conifer has rich golden needles. Color is most intense in winter, but it is still rather gold in summer.
Nana Aurea Japanese Yew	Taxus cuspidata	Nana Aurea	sun	2'	N/A	N/A	Slow growing, low spreading dwarf selection of the Japanese Yew whose young radially spreading needles are an eye-catching golden-yellow creating a stunning color contrast with the dark green mature foliage.
Technito Arborvitae	Thuja occidentalis	Bailjohn	sun-part shade	6'	N/A	N/A	Dark green foliage. Forms compact pyramidal outline.

Common Name	Genus species	Cultivar	Light	Height	Bloom	Color	Product Description
Whipcord Western Red Cedar	<i>Thuja plicata</i>	Whipcord	sun	5 - 6'	N/A	N/A	This unusual form of the Western Red Cedar is distinguished by long, thick glossy thread-like tendrils. Slow growing, multi-branched globe shape mound. Dark green foliage turns bronze in winter.
Spring Grove Arborvitea	<i>Thuja plicata</i>	Grovepli	sun-part shade	18-24'	N/A	N/A	Resistant to deer browsing. Dark-green glossy foliage that maintains color well. Perfect for privacy or well-behaved hedge.
Cole's Prostrate Canadian Hemlock	<i>Tsuga canadensis</i>	Cole's Prostrate	sun-part shade	1 - 2'	N/A	N/A	A true, dwarf spreading Canadian Hemlock with main branches that curve and bend downwards creating a graceful, prostrate habit. A superb architectural plant for cascading down walls and over rocks.
White Fountain Canadian Hemlock	<i>Tsuga canadensis</i>	White Fountain	part shade	2'	foliage	N/A	Most attractive compact, mounded form of the native Canadian Hemlock composed of slender branches leaving white foliage that initially ascend before gracefully arching downwards. Plant grows around 3" per year.
Moon Frost Canadian Hemlock	<i>Tsuga canadensis</i>	Moon Frost	part shade	3 - 5'	N/A	N/A	Variegated Canadian Hemlock with bright white new spring growth is reminiscent of frost on a moonlit night, older inner foliage retains light tones and whitish appearance. During winter, the white foliage is often blushed pink.
Canadian Hemlock	<i>Tsuga canadensis</i>		full sun to shade	30-40'	foliage	N/A	Oregon grown. Pyramidal growth, branches often droop. Easy to shear into hedge.
